

## **MIOMIR RAJCEVIC**

The following will be my activities in the forthcoming period as a member of CIFEJ, and if becoming the member of Board of Directors (in fact in any case):

I will gladly continue to work on further intensifying of communication between the members of CIFEJ and potential new members in order to make more popular and evident the values that CIFEJ has been promoting for almost 50 years, already. I believe that most of our members will find interest to join exact project aimed to give support to high quality films for children and youth.

Our contribution as professional could be stimulating for media and film workshops and non-formal creative groups all over the world with the basic task to give the chance to greater number of children and youth to learn film language and the modern tools and language of media communication with the target of global communication between children and youth of different cultural, traditional, ethnic, language and confessional background.

The influence of high professionalism of our members should be support to media educators and creative groups to spread the seed of media language and form the network for simple exchange of knowledge, ideas, cooperation and mutual production of various media products (animation, web communication, short documentaries, preparations on scripts, further education for the media educators etc.).

I will be happy to share with others and incorporate in new projects, targeting as well local (national) as regional (international) interest groups, my long experience on projects dealing with media literacy, media education and communication using the new ICT and IT to give the stimulating environment for children and youth to express themselves.

All mentioned is focusing very much on intensifying of CIFEJ and Kids for Kids Festival Internet Portals as an efficient and simple way for exchange of information. We need to initiate wider acceptance of CIFEJ and KFKF networks as a base for future work on education and presentation of children's and youth production-all kind of media works.

I am especially interested in developing with other colleges from CIFEJ and other potential professional associates' methodology and procedures of media literacy, media education of children and educators with the low budget possibilities. That will give a chance to a great number of children and youth in the countries with limited financial possibilities to join international projects.

I see my possible contribution in the work of regional projects, in accordance with CIFEJ activities as KFK that could become available to greater number of organizations and creative workshops with the bigger role of CIFEJ in education of the young population.

Of course, I am ready to support all existing activities and ideas of CIFEJ and its members on permanent bases for the well-being of our organization.

Best regards,

Miomir
